

My family listens to K-LOVE daily and my daughters are greatly impacted by the positive messages from the music and commentators. I cannot tell you what a difference it makes to my teenage daughter and her friends! Most of the alternative radio stations that play music enjoyed by teens are filled with negative and damaging images through vulgar and obscene lyrics. We would be lost without K-LOVE to turn on every time we get in the car. My daughters know all the lyrics to the songs and as a mom, it's wonderful to hear positive, encouraging, and edifying words that promote great morals and values. In a day where moral corruption of our youth is on the rise and music is a key factor in influence, I would think the FCC would strive to keep every station open that would provide positive influences to our youth. I can't stress strongly enough how much our children need stations like K-LOVE in every community. Please don't make a decision that would prevent our children, including at-risk youth and others, from being exposed to possibly the only tool that will develop positive, productive citizens in our communities.
